

1600 Corner Shelves

Corner freestanding or wall shelves, 1600 mm inner width. Each level comprises right-side and left-side shelves, joined by two inner flat bars that fix them in place. The shelves, with rounded corners, have trims on both ends that conceal the interior of the profile. Its corner arrangement and its strong joints give this model great stability, which allows it to keep the measurement of its bases at 250 mm, without the need to use wall or floor anchorings. It is possible to integrate sliding panels of 725 mm and 1125 mm, in front or rear position. Combinable with the rest of the Wing shelvings. The maximum recommended height is seven shelves.
