

Aero Nook

Aero NOOK is a compact workplace for those mobile employees who land in the office to focus on episodic tasks but who doesn't require a permanent desk of their own. It offers more privacy than traditional work-bench-type solutions commonly used for such occasions. Nook is a 3-in-1 solution including a screen above eye-level to increase privacy and reduce acoustics, a desk measured for laptop work and a seat comfortable enough to stay for the whole day. Designed for open-plan offices, the Nooks can be installed as separate islets or as rows.

FRAME

Solid wood; plywood and metal frame
