

BALÙ XL

The deep, rounded seat encourages relaxation and conversation. The perfectly balanced volume of the body matches impeccably with the characteristic support frame, thus redefining the typical "tub" chair. The internal plywood body and the polyurethane and Dacron upholstery, flanked by a beech frame, provide excellent comfort. Balù comes in many colour variations and neutral or tone-on-tone shades, in line with the collection colours. Balù is a reassuring presence and a perfect addition to an imposing dining area with a keen eye for design. This versatile seat can be used in any space, such as meeting rooms, small conference rooms and reading rooms, as well as domestic environments such as living rooms, study areas and bedrooms, which require performance combined with comfort and a strong personality. The Balù chairs, available in a variety of finishes and upholsteries, may be freely combined together, both at home and in public areas.

DESCRIPTION:

Metal base, padded shell

BRAND

Traba

TrabA' provides a reinterpretation of contemporary design, creating a unique style that does not merely follow in the wake of the latest trends, but offers an authentic way of living each and every space. The [chairs and tables](#) of the TrabA' collection arise from a fundamental requisite: to create a calibrated hybridization of tradition, modernity and innovation. The project was designed by emilio nanni for TrabA'. The designer has conducted an in-depth research into the concepts chair and table, reflecting on their archetypes and developing a new form of essentiality for this collection. The result is a series of universal products suited to the domestic and contract furniture markets and particularly suitable for bright and welcoming environments, eager for objects that add a touch of style and prestige, as well as a contemporary look, to private and collective living spaces. The wide range of seats on offer convey a sense of modernity with a twist, combined with a tangible quality reflected in a meticulous attention to detail and finishes, for a range permitting great versatility of
