

BOBY - STORAGE TROLLEY

Design by Joe Colombo

Boby is much more than a simple container, it is the container trolley that has made design history. Functionality and detail represent its strong points which, together with the undeniably pop flavor, continue to make it the favorite trolley both in the creativity sector, as well as in the medical and home sector.

Designed with drawers and compartments in injection-molded ABS that guarantee easy vertical modularity, Boby allows you to obtain customized capacities, while the polypropylene wheels guarantee its mobility. The ABS plastic structure, composed of drawer and shelf modules, is mounted on 5 polypropylene swivel casters and offers 4 different height solutions. Part of the permanent collection of MoMA in New York and the "Triennale" in Milan, Smau prize in 1971.

Product specification

Choice of various colours with ABS, timber or cork top.

Available in 4 modular heights:

ADDITIONAL INFORMATION

Stacking	No
Leadtime	12 weeks +
Material	Plastic
Price	200 – 500

BRAND

B-Line

Giorgio Bordin, who wanted to revive historical Italian design icons and offer [furnishings](#) for the residential and [contract](#) sectors, founded B-Line in 1999. Since the beginning, the brand has combined re-editions with contemporary furnishing accessories designed by international creatives. B-Line products are transversal, ideal for indoor and outdoor residential contexts and workspaces. They are also suitable for furnishing those increasingly hybrid and flexible places that must satisfy the needs of everchanging contemporary lifestyles. The company pays particular attention to sustainability and the durability of its products, whose materials are entirely Made-in-Italy. B-Line's commitment to the environment involves the entire production process with its finished and semi-finished products regularly subjected to careful quality control procedures.
