

Spence Booth

Spence is refined and particular, designed with careful attention to detail allowing for different colour palettes and materials to combine for a subtle and impressive result. A high-back, vertically-slatted timber structure frames the Spence, whose linear lines are divided by the softer contours of its half-circle backrest. In its truest form, the seat is crafted using exposed, Australian timbers to showcase their natural intricacies against the painted frame, though can also house upholstered seat padding. Spence can be arranged in linear or back-to-back configurations for indoors or outdoors.

How it works
Create a truly unique interior for your space through our custom booth and banquette manufacturing process, where we will assist you in finding the perfect seating solution. Each design carries specific unit lengths, which can be lengthened and customised to suit any application.

To get started, we'll need to know:

- Your selected **booth style**;
- The intended seating capacity/**configuration** of the space;
- Your personal touches, selected from available **upholstery** and **framing finishes** (see below).
