

Collider Retractable – upholstered

Collider is a purpose-built **retractable auditorium and theatre seat** designed for performing arts centres, conference centres, theatres and civic centres where the environment requires flexibility throughout dynamic and varied use. Engineered for durability, comfort and long service life, it delivers reliable and comfortable seating for commercial environments demanding space flexibility without sacrificing comfort.

The ergonomic backrest and supportive seat profile provide comfort during extended performances, presentations and events. Collider integrates clean architectural lines with practical functionality, making it suitable for both contemporary and traditional theatre interiors.

Designed for high-traffic venues

- Commercial-grade auditorium seating system
- Floor-fixed retractable seat, for use with retractable bleacher/platform systems (motor-actuated)
- Durable structure
- High-density moulded foam for long-term shape retention
- Fold-down backrest mechanism for efficient collapsing when initiating retraction of platform
- Row mounting suitable for tiered and flat-floor installations

Flexible specification options

- Wide range of commercial upholstery fabrics and finishes
- Padded armrests or integrated cupholders
- Custom row lengths and layout configurations
- Suitable for acoustic and fire compliance requirements

Collider is suited to **theatres, cinemas, performing arts centres, universities, school halls, council chambers and conference facilities** requiring a comfortable, premium retractable seating solution.
