

Copenhagen

Circular Dining Table with Soft-touch Surface

The Copenhagen CPH Deux 220 is a table with round top, which is a modern and easy to clean dining table for the kitchen or dining area thanks to its easy-soft-touch surface of linoleum.

EASY-CARE SURFACE

The special feature of the table is located in the surface finish: With the help of latest nanotechnology, Hay has developed a laminate that produces a matte soft-touch surface, which is not only extremely easy to clean but also doesn't get fingerprints on the plate. The legs, however, are made from lacquered oak. As part of the Copenhagen collection is the table available in different designs and colours.
