

## Daily 2

---

Jun Yasumoto , 2021

The DAILY 2 chair features a retro design, which is reminiscent of the old-fashioned school chairs with arms that were reserved for teachers or placed in conference rooms. The two generous armrests, made from tubular metal, immediately make the chair comfortable, resulting in a more original, dynamic-looking design. They are sized to comfortably support the arms, which is also handy for reading a newspaper or tablet: this makes the wood and metal armchair ideal for cafes, bars and breakout spaces.

Daily 2 seating is stackable and offers a choice of two finishes for the curved plywood (natural oak or black oak) and two finishes for the frame (black or white). The collection also includes an armless chair model.
