

## Ditto Modular Group S

---

Ditto Modular Group S is a compact configuration within the Ditto modular seating system, designed for flexible hospitality layouts and smaller seating zones.

Built from a defined set of modular units, Group S allows designers to create curved or clustered seating arrangements that maximise comfort while maintaining efficient circulation within restaurants, cafés and hotel lobby environments.

Its modular geometry supports standalone lounge groupings or integration into larger Ditto systems, offering continuity across multi-zone hospitality fit-outs.

Constructed with FSC-certified plywood and moulded foam, Ditto is engineered for commercial durability and repeated daily use.

### HOW DITTO MODULAR GROUP S WORKS

Each module carries a defined footprint, allowing curved seating layouts to be configured to suit available space. Modules can be combined, mirrored or extended to create a tailored seating arrangement.

Custom upholstery and framing finishes allow Group S to integrate into a wide range of commercial interiors.

### TO BEGIN YOUR LAYOUT PLANNING, WE WILL REQUIRE:

- Your preferred configuration
- The intended seating capacity
- Upholstery and framing finish selections
