

Ditto Modular Sofa

Ditto Modular Sofa is a linear modular seating unit designed for hospitality environments requiring continuous banquette or wall-based seating. Engineered as part of the Ditto modular seating system, this configuration supports extended seating runs along walls, glazing lines and perimeter layouts, making it ideal for restaurants, cafés and hotel dining spaces. The repeatable unit geometry allows seating lengths to be extended or adapted to suit floorplans, enabling efficient space planning while maintaining visual consistency. Constructed using FSC-certified plywood and high-density moulded foam, Ditto is built for commercial durability and daily high-traffic use.

HOW DITTO MODULAR SOFA WORKS

The system is based on defined unit dimensions that can be combined to create straight seating runs or integrated into broader modular layouts. Units can be customised in upholstery and base finishes to align with interior design schemes.

TO BEGIN PLANNING YOUR LAYOUT, WE WILL REQUIRE:

- Overall required seating length
- Floorplan or wall dimensions
- Selected upholstery and framing finishes

APPLICATIONS

- Restaurant banquette seating
- Hotel dining seating
- Commercial wall seating
- Continuous hospitality seating runs
- Café perimeter seating
