

Ditto Ottoman

Ditto Ottoman is a modular upholstered seating unit designed to complement the Ditto modular seating system or operate as standalone commercial soft seating. Its compact footprint and rounded geometry make it ideal for hospitality breakout zones, hotel lobbies, waiting areas and flexible lounge environments where adaptable seating is required.

The ottoman can be specified individually, grouped into clusters, or integrated into larger Ditto seating configurations to create layered and dynamic seating layouts.

Constructed using FSC-certified plywood and high-density moulded foam, Ditto Ottoman is engineered for commercial durability and daily high-traffic use.

HOW DITTO OTTOMAN WORKS

The unit can function as additional seating, a central gathering piece or a modular extension within a Ditto configuration. Upholstery options allow full integration into interior palettes and branding schemes.

APPLICATIONS

- Hospitality breakout seating
- Hotel lobby soft seating
- Commercial waiting areas
- Flexible café seating
