

## DRUM-M S-2017

---

Combining the classic features of Paged. Woven rattan with the strength and technical excellence of light bentwood. The lower shelf, crafted from natural weaving and stretched over a wooden frame, relies on precise tension to maintain its structure, much like the skin of a drum. This tension is essential to its durability and serves as the inspiration behind its name. Designed to be versatile, Drum features a bentwood edge framing the tabletop, while the woven surface beneath functions as an elegant, openwork shelf. Available in two shapes and sizes, it can stand alone or be part of a cohesive set, offering both function and aesthetic harmony.
