

DUAL DISPOSAL LIQUID BIN SOLUTION

The easy to use liquid and bottle disposal bins allow passengers to empty bottles of their liquid contents before passing through security, or areas where drinks and liquids are not allowed. The liquid disposal bin is also a great addition to any commercial facility waste and recycling program for convenient beverage disposal and to reduce recycling contamination.

Liquid Disposal Bin Top Funnel

The oval aperture at the top includes a plastic funnel which channels the liquids (up to 50 Liters) into the removable polyethylene (PE) tank inside. The plastic funnel includes a strainer to prevent objects from falling into the tank container. The material used for the casing of the bin is non-flammable.

Polyethylene Tank

The PE-tank container is suitable for temporary storage of beverages and is leak-proof. Draining is performed via a faucet which is attached to the tank container, meaning it does not have to be removed from the tank.

Door and Wheels

The bin-door is equipped with a snap-lock and not accessible for unauthorized personnel. The door is opened with a provided key and allows a quick and simple removal of the tank container or emptying via the attached faucet. The plastic funnel can be pulled out for cleaning. Wheels are a standard part of this bin to allow easy rolling to the next drainage point.

About Liquid Disposal

Dual Liquid Disposal Bins allow passengers to empty their liquid contents before passing through security or other areas where liquids are not permitted, as well as recycle the empty bottle in the same receptacle. This portable liquid disposal bin can be moved around to different locations as needed, but also allows it to be easily drained and managed by maintenance staff. The result is a self-contained bin that reduces mess and provides airports and passenger terminals with a seamless solution to ease the travel experience.

We are very pleased with the dump station. The appearance is much nicer than what we were using and makes it much easier for custodial staff to maintain."

—**Jerry Brasher, Director of Maintenance and Custodial Services, Tucson Airport Authority**
