

EDITH IMB

With this project, Traba' launches the collaboration with designer Massimo Broglio, who, for the Salone del Mobile 2017, has created a stackable (or non-stackable) chair with a cross structure made from beech and ash with legs featuring a circular section that narrows at the ends. Edith comes in many different shades of colour and with various types of padding and features simple and understated Scandinavian styling, making it the ideal chair for both home environments and large public projects.

DESCRIPTION:

Beech frame with padded plywood seat
