

## Filo Chair

---

Filo has a rounded moulded plywood seat and back and four solid oak legs which give the chair a strong and grounded expression, yet the armchair is unexpectedly light. The Filo Armchair is available with an upholstered seat and also in a non-upholstered version. Filo works well around a dining table, as a desk chair, in a restaurant, in a hotel room, or by itself just to add a modern touch to any room.
