

## FLAT Equalizers

---

FLAT Equalizers allow operators to stabilise their existing tables with just a press of the table top.

Equalizers adjust up to 6mm (1/4") and lock in place to stabilise the table, creating a great dining experience. Users of Equalizers can also take advantage of FLAT's unique table top alignment capabilities. By tilting or lifting the table top in the direction of the adjoining top, the feet adjust, helping to create an aligned surface. [Learn more...](#)

Check the thread size of your tables using the sizing guide and choose the corresponding thread size below.

- Metric sizes (commonly used in Australia): M6, M8, M10
- Standard sizes (commonly used in U.S.): 1/4", 5/16", 3/8"
