

Fono

Gaber acoustic products ensure significantly improved acoustics in private homes as well as in offices, hotels and public spaces; decorating modern buildings and already existing installations, quickly and easily removing reverberation without structural modifications. Fono is an innovative acoustic system that re-interprets the concept of modularity and customization: the individual panels can be assembled together to create endless decorative compositions, thus providing maximum creative freedom. Shapes, colours, graphics and materials for Gaber acoustic systems are conceived in partnership with leading designers, in order to ensure total satisfaction, both technical and decorative, on project requirements.
