

GENOA MET

The Genoa seating collection, designed by the young Cesare Ehr, is expanding with the stool and chair with armrests versions, also in the outdoor variant. The characterizing element is the 'one line' backrest, obtained from the curvature of a single metal tube which - with its virtually infinite sinuous line, extended into this new version in the armrests - fits discreetly into any space, connoting it with lightness. At the Salone del Mobile 2019 the outdoor version of the seats is presented - with a body in integral polyurethane painted in the mass and in the mold - also available with a backrest woven with colored rope, which enhances, in addition to aesthetics, the level of comfort. The powder-coated metal tubular structure is available in a wide range of colors; the slightly curved seat - for the indoor versions - is in ash wood (natural or painted), or padded with different fabrics, leather or eco-leather.

DESCRIPTION:

Stackable structure in painted and lacquered metal in different colors, wooden seat.
