

Hyppo

The result of playful experimentation, the Hyppo coffee-table family is designed for outdoor use but adapts with versatility to indoor spaces. The inspiration, clear even from the name itself, is linked to the morphology of the hippopotamus and is revealed in the design of the aluminium legs, large and sculptural. The contrasting top, made with coloured paste laminate, stands out instead for its thin profile and deliberately irregular contour, reminiscent of the animal's body. Available in different diameters and heights, Hyppo's variants can be combined to recreate islands of coffee tables, welcoming the placement in any corner or living room. The colour palette, which includes ochre, crimson, quartz green, and petroleum green in a matte finish, also promotes the complementarity of the combination.

SPECIFICATIONS

Leadtime	12 weeks +
Linking	No
Material	Metal
Stacking	No
