

Mani Table

We received many requests for a large-sized table with a pure solid tabletop. Being over three meters in length, the tabletop required steel beams so that it would not become warped. In addition to the black beams, the table has steel legs with a diameter of 48.6 mm. The contrast of the pure wood and black metal highlights the attractiveness of the sleek and solid tabletop. The same locations are never repeated for the attachment of the tabletop, and different colors and patterns are skillfully assembled so that no two tables are alike. You can select a table size to match your needs. We hope you thoroughly enjoy the rich unadorned feeling of the materials used.

SPECIFICATIONS

Stacking	No
Leadtime	2 - 4 weeks
Origin	Made in Australia
