

# Marlen Chair Wood

---

Hybridisation is the concept on which the Jackie collection is based. Designed by Emilio Nanni, it is a chair in which the stable solid wood frame meets an inviting metal rod backrest covered in a woven rope design. This year Jackie is enhanced by new, extremely bold and distinctive colours, in a virtuous, harmonious dialogue between heterogeneous materials, ethnic touches and artisan processing techniques. All to create an innovative design for the perfect chair to make every contract environment stand out, with style.
