

MOMO NET 1

Jeremiah Ferrarese , 2020

MOMO NET 1 is a designer chair made from expanded metal mesh that is e-coated before being painted, making it highly resistant. This makes it an excellent candidate for outdoor use, too, whatever the climate. The holes in the mesh make it particularly ideal outdoors when the temperature climbs.

Light in design and weight, the Momo Net 1 chair can be readily used in bars and restaurants, making it quick to shuffle seating around to accommodate the requirements of patrons.

The frame has six colour options and also comes in an armchair version and a tall stool size.

BRAND

Colos

All projects by Colos emerge from the opportunity given to young designers from various nations to encounter the world of Italian industry. This encounter between the designers' esthetic and functional research and the company's great industrial experience leads to solid and elegant products which are developed within an optimized production process.

COLOS

The manufacturing is exclusively carried out in the company factories in Loria, Italy. In doing so, Colos can ensure the quality of its products and of the working conditions of its personnel. Ethical, durable and affordable: this is what a Colos product is to us.
