

#### NOVA C

The design of the Nova C creates seamless seating that promotes a natural flow. Its ergonomic contours support comfort, while the small footprint makes efficient use of space. Modules are held in place by their own weight, with no need to bolt sections to the floor. Units can be taken apart for thorough cleaning or reconfiguration.

Like all Green Furniture Concept pieces, natural wood tones bring warmth and a sense of calm to public interiors. A wide selection of colours and optional accessories allows customisation so each project can be tailored to the brief.

Nova C Series is designed and manufactured by our partner, Green Furniture Concept, and distributed exclusively to airports and passenger terminals throughout Australia by Hospitality Furniture Concepts.

ADDITIONAL INFORMATION

## ENDLESS CONFIGURATIONS

Nova C is a collection of straight and curved pieces, with or without backs, that connect to create a wide range of combinations. It is available in Bench, Lounge and Perch configurations.

### Best suited to

- Airport and public waiting areas
- Workplace breakout and collaboration zones
- Education commons and learning hubs
- Libraries and civic interiors

## POWER UP

Easily add power modules below any seat, or specify tables with integrated wireless charging to support modern device use in public and workplace settings.

### Specification support

Share your floorplan and seating capacity. We can help with configurations, finishes and documentation for specification.

[Send floorplan for layout review](#)

## NOTABLE FEATURES

- Designed for modular planning across straight and curved layouts
- Options for backs or backless elements to suit zoning and circulation
- Commercial-grade construction for high-traffic environments
- Manufactured with a strong focus on environmental sustainability

## APPROVALS AND CERTIFICATIONS

- Certified UL GREENGUARD Gold

## FAQS

### [Can Nova C be configured for curved layouts?](#)

Yes. Nova C includes straight and curved modules that can be combined to suit zoning, circulation paths and seating capacity.

### [Can Nova C include power and charging?](#)

Yes. Power modules can be specified below seats, and tables can be selected with integrated wireless charging options.

### [Is Nova C suitable for high-traffic public spaces?](#)

Yes. Nova C is designed for commercial environments such as airports, education facilities and civic interiors where durability and easy maintenance matter.

### [What do you need to quote or configure Nova C?](#)

A floorplan (or key dimensions), target capacity, preferred layout type and finish selections are enough to begin layout planning.

## About

**Green Furniture Concept** designs sustainable seating and lighting for public interiors. Their focus is on creating welcoming spaces that are tailored to each client's needs and built to solve real-world challenges.

All products are made in Europe and feature in destinations such as Dublin Airport, Topanga Mall (Los Angeles), and Stockholm Central Station. In Australia, Hospitality Furniture Concepts are the exclusive distributor for Green Furniture Concept.

## Creating Public Spaces People Want to Be In

Green Furniture Concept transforms public spaces into people-centred environments. Their designs bring warmth, ambience, and inclusivity to airports, stations, and other high-traffic interiors. Each piece encourages connection and calm — creating spaces people enjoy, share, and return to.

## Designing spaces that drive profit.

Green Furniture Concept creates inviting environments near retail zones — spaces that encourage people to pause, take in their surroundings, and stay a little longer. These are places that spark curiosity, inspire connection, and naturally lead to spending.

At Edinburgh Airport, areas furnished with Green Furniture products saw a **14% increase in retail and F&B sales**, proving that good design doesn't just look right — it performs.

### Public Space Project

The design of the Nova C creates seamless seating that promotes a natural flow. Its ergonomic contours support comfort, while the small footprint makes efficient use of space. Modules are held in place by their own weight, with no need to bolt sections to the floor. Units can be taken apart for thorough cleaning or reconfiguration.

Like all Green Furniture Concept pieces, natural wood tones bring warmth and a sense of calm to public interiors. A wide selection of colours and optional accessories allows customisation so each project can be tailored to the brief.

Nova C Series is designed and manufactured by our partner, Green Furniture Concept, and distributed exclusively to airports and passenger terminals throughout Australia by Hospitality Furniture Concepts.

## BRAND

### Green Furniture Concept

Green Furniture Concept creates sustainable furniture and lighting for public interiors. Their work focuses on transforming high-traffic environments into welcoming, people-centred places. Each collection is carefully designed to enhance comfort, movement, and connection within airports, retail hubs, and civic spaces.

Manufactured in Europe, their products can be found in global landmarks such as Dublin Airport, Topanga Mall in Los Angeles, and Stockholm Central Station. Every piece combines timeless design with long-lasting materials and circular production methods — proving that sustainability and design excellence can coexist seamlessly.

Green Furniture Concept's approach goes beyond individual products. It's about creating places where people want to linger — spaces that are both profitable and restorative. In fact, Edinburgh Airport recorded a 14% increase in retail and F&B sales in areas furnished with Green Furniture products.

Harrows are the exclusive partners for Green Furniture Concept in New Zealand, while Hospitality Furniture Concepts proudly represents the brand in Australia.
