

Parkway T-Base Table

The Parkway twin base offers the Norock patented self-stabilising function for your larger, rectangular tabletops. Perfectly matches with all Parkway bases and complementing other Norock designs.

The Norock Parkway twin base self-stabilising table base captures an industrial rawness. Angular and architectural, the exposed componentry and minimalist design illustrates the elements - crafted, zinc-plated steel, exposed fasteners and a dichotomous simplicity.

With a special zinc coating, Parkway twin base is suitable for both indoor and outdoor applications.

Self-stabilising table base - Norock's award-winning bases use a simple mechanical system with four pivoting legs that are interconnected in such a way that they must reach an average weight loading on all four feet. When a table is placed on an uneven surface the feet will move until all four feet reach a state of equilibrium or more simply, a state of stability.

Powder-coated steel with a zinc phosphate layer for added corrosion resistance

Finishes : Powder coat Metallic Silver, Sandstone Black, Rust, Antique Bronze, White

*Maximum table top size - 1500mmL x 800mD
