

Porter Tiled Table

The Porter table combines a tiled table top with a solid disc base, making it a strong choice for pubs, bars and casual dining spaces. The tiled surface gives it a classic pub feel, while the pedestal base keeps the look clean and practical.

Designed for indoor commercial use, the Porter table offers good stability, adjustable feet for uneven floors, and clear leg room for guests. It works well in venues that need a durable and easy-care table for daily service.

The Porter table suits pubs, bistros, beer halls and casual restaurants, and pairs well with timber, metal or upholstered dining chairs.
