

Prop Armchair B-4398

With its late 19th-century origins, it's no surprise that Polish manufacturer Paged Meble has developed into one of the globe's major suppliers of wood-based interior furniture. There's nothing old-world about this brand's contemporary range, however.

Made from solid beech with natural veneers and designed along clean, natural-looking lines, Paged Meble furnishings pay homage to contemporary Scandinavian style. The New Prop Range for Paged designed by Nikodem Szpunar is a classic form inspired by design prevailing in the 50s. Characteristic structure based on traditional turned elements with a seat and a backrest made of plywood. Sophisticated details emphasise natural methods of wood processing and bonding.

Material: Beech
Suitability: Internal
Warranty: 2 years
