

Seina

The Seina Chair with aluminium frame and teak wood is designed for commercial outdoor settings where durability and clean design matter. The powder-coated aluminium frame provides a lightweight, corrosion-resistant structure suited to high-use environments such as cafés, restaurants, and hotel terraces. Teak wood detailing introduces a natural contrast, offering both visual warmth and long-term performance in outdoor conditions.

Built for indoor and outdoor use, the Seina Chair performs well across alfresco dining areas, rooftops, and hospitality venues exposed to the elements. The teak components are naturally weather-resistant and will age to a soft silver patina over time, while the aluminium frame maintains its strength and finish with minimal upkeep. This makes it a practical choice for operators seeking low-maintenance outdoor furniture.

With a balanced mix of metal and timber, the Seina Chair fits easily into both modern and relaxed environments. Its simple form allows it to work across a wide range of commercial applications, from casual dining to more refined outdoor settings, while maintaining a consistent and durable seating solution.

SPECIFICATIONS

Arms	Yes
Leadtime	12 weeks +
Linking	No
Material	Wood, Metal
Stacking	Yes
Price	200 – 500
