

Setz bariatric

Robust steel construction of Setz™ provides the strength needed in bariatric applications. The 30-inch wide, ergonomically contoured seat pans are made from perforated steel. Chairs can be complemented with arms and upholstered pads for added benefit and comfort. Free standing or floor mounting glides are available on single units. For an easier sit, a 19.5-inch seat height is available.

Comfortable and resilient seating for healthcare facilities, Setz bariatric can accommodate static loads up to 1000 pounds.
