

Si-Si Vibes

Si-Si Vibes embodies the evolution of the Si-Si chair, distinguished by a brand-new pattern enriching both the seat and backrest.

Inspired by the fluid rhythms of sound waves and the harmonious movements of acoustic vibrations, the texture gives the chair a unique, distinctly contemporary character, subtly evoking the synaesthetic effects created by the interaction between visual and tactile perception. Made from certified regenerated plastic with a tubular metal frame, Si-Si Vibes is part of S•CAB's Go Green line.

SPECIFICATIONS

Arms	No
Leadtime	12 weeks +
Linking	Yes
Material	Plastic
Stacking	Yes
Price	200 – 500
