

Silla Aro

DESIGN BY CARLOS TÍSCAR

691M

Semi-upholstered chair with wooden base and backrest. Available in beech and oak and with multiple fabric options. The Aro collection arose from the idea of building a family of chairs based on a type of traditional construction that we can see in some Windsor-type chairs. The milling that runs along the crossbars where they are attached to the legs is a key detail that gives this collection a unique, handcrafted, quality finish.
