## DIE-CAST ALUMINIUM AUDITORIUM SEATING

Skene is a fixed auditorium and theatre seat defined by its distinctive design and precision craftsmanship. Formed from high-quality aluminium alloy using die-cast moulding, it brings a refined architectural presence to public spaces.

The clean metal structure delivers strength with a sleek, modern aesthetic, while the torsional spring damping mechanism ensures smooth, controlled seat return after use. Skene balances visual impact with reliable performance in high-traffic venues.

Ideal for theatres, lecture halls and performance spaces seeking contemporary fixed seating with engineered durability.
