

TARGO

TIMBER AUDITORIUM SEATING WITH ACOUSTIC PANEL

Targo is a fixed auditorium and theatre seat defined by its strong timber construction and integrated acoustic panel. Designed for lecture halls, performance venues and cultural spaces, it brings warmth and architectural presence to modern interiors.

The timber front and back create a clean, crafted aesthetic, while the acoustic panel assists with sound control in busy auditoriums and presentation environments. Upholstered seating ensures comfort during extended sessions without compromising durability.

Ideal for theatres, universities and multi-purpose venues seeking fixed seating with a natural wood finish and acoustic performance.
