

# Verissimo

Inspired by the connection between architecture, furniture, and nature, this collection of aluminum planters has been designed to create green ecosystems in all kinds of spaces—from warm, organic environments to minimalist and refined interiors—suitable for both residential settings and contract projects.

The collection is structured around two essential elements: heads and bases, which can be combined to create a wide variety of configurations. Additionally, the option to choose from different combinations within a carefully curated range of colors further expands the aesthetic possibilities. Its broad range of volumes allows for planting anything from small ornamental species to larger vegetation.
