## New Eau Rouge : Lightness, elegance and tradition

A collection of chairs designed to be used outdoors and to mould space into a personal and social dimension. This project expresses the comfort and softness of an upholstered armchair thanks to nautical rope.

A sturdy and comfortable frame is held together by just a few welded joints. The seat and backrest are made from plain woven rope to achieve a deliberately understated decorative effect.

A balances and graceful combination of light and solid shapes is the unique feature of this chair.

## Doc

The Doc collection chairs offer a modern interpretation of a classic model. They are best seen from the back, where the fabric on the backrest forms a frame around a wooden surface, which has a natural feel and to which the back legs are attached, balancing the materials and creating a warm, cosy mood.

## Dopo Wood

The new chapter of the DOPO Collection focuses on the amazing sense of comfort provided by Lounge. The new armchair version is crafted from a skillful combination of materials and a wooden frame..

# COLOS

Sustainable, light, resistant.

When durability meets design.
